PROFILE SUMMARY

I am a passionate and detail-oriented Data Analyst with a solid foundation in data analysis, statistics, and programming. I possess strong proficiency in SQL and have experience in analysing and managing large-scale databases. My expertise also includes creating financial reports using leading visualization tools such as Tableau and Power BI. In a dynamic startup environment. Skilled in collaborating with cross-functional teams, I drive agile business strategies and data-driven decisions. Ambitious and adaptable, I aim to deliver impactful insights and enhance operational efficiencies in fast-paced environment.

WORK EXPERIENCE

Data Analyst | Infilytics Private Limited

Mar 2024 –Present

- Developed and optimized complex SQL queries and stored procedures for real-time data analysis, improving analytics efficiency by **60%**. Automated recurring reporting processes using Python and built reusable data templates for financial institutions, reducing manual effort by 3–4 hours per report.
- Created dynamic dashboards and KPI using Power BI, enabling clients to gain real-time operational insights. Built a SQL repository of stored procedures to streamline ad-hoc reporting and enable faster access to key metrics.
- Maintained high standards of data quality, leading regular data cleansing initiatives and proactively identifying performance bottlenecks and ensuring seamless data flow and reporting reliability.
- Gained business knowledge of banking, financial risk management, Internal audits and regulatory compliance, enabling data solutions to align with industry-specific requirements with end-to-end client support, including requirement gathering, issue resolution and post-deployment assistance and strengthening client relationships.

SKILLS

Code Languages: SQL, Python, R

Analytical Focus: Data Analysis, Visualization, Data Modelling, Business Intelligence, ETL Processes.

Frameworks: Pandas, NumPy, Matplotlib, Scikit-learn, Selenium

Database: MySQL, Oracle, Teradata, Microsoft SQL Server, Postgre SQL

Tools: Microsoft Excel, Power BI, Tableau, Microsoft Office, VS code, Github, Azure Data Factory

Soft Skills: Time Management, Adaptability, Problem Solving, Analytical Thinking, Communication, Project management

EDUCATION

B. Tech in Information Technology | Atmiya University, Gujarat

2020-2024

I have completed my studies and earned a distinction award for my outstanding performance.

CERTIFICATION

Google Data Analytics Professional Certificate - 2024

Hacker Rank SQL Advanced - 2024

AWS Academy Machine Learning Foundations - 2023

PROJECTS

Inventory Database Analysis and Development

Developed an inventory database using SQL Server to track products, suppliers, and stock levels. Automated stock updates and reorder alerts. Reduced stock discrepancies by 25% and excess inventory by 15%. Improved accuracy and provided real-time insights, optimizing inventory management and decision-making processes.

Power BI | Link : github.com/nilimaumradiya

- Amazon Sales Dashboard -:
- Library Book Evaluation
- Zomato Analysis with Python and Power Bi

Stock Trend Analysis

Developed a stock trend analytics system using Python and Streamlit to predict stock price movements. Utilized machine learning models and a web interface for real-time visualizations. Improved forecasting accuracy, supporting better investment decisions and financial planning through advanced analytics.

Textual Analysis: Web Scraping and Insights Generation

Scraped web data using Python, performed sentiment and readability analysis with NLTK and pandas. Compiled insights in Excel, supporting strategic decisions by analyzing industry trends and sentiment in online content. Provided valuable insights to client.
